

vue-pdfz

Customizable, i18n-ready, SSR-safe PDF viewer for Vue

This is a real, multi-page document rendered by vue-pdfz. The text is selectable and searchable, the contents link to each section, and the form on the last page is live – try them.

Overview

vue-pdfz is the viewer shell around vue-pdf-embed and PDF.js: a toolbar, page navigation, zoom / rotate / fit, a thumbnails sidebar, full-text search, print, download, annotation and form rendering, theming, keyboard shortcuts, accessibility, and internationalization.

✓ **Navigation & layout**

Continuous, single, and facing layouts with keyboard control.

✓ **Zoom, rotate & fit**

Presets plus free zoom, auto / page-fit / page-width, 90° rotation.

✓ **Full-text search**

Cross-page matching and highlighting with match count.

✓ **Thumbnails**

Lazily rendered, collapsible, with a drawer on narrow widths.

✓ **Annotations & forms**

Annotation layer, interactive AcroForms, and links.

✓ **Theming & i18n**

Design tokens, light / dark / auto, built-in locales, RTL.

Getting around

You are reading this document inside vue-pdfz. The toolbar lets you page through it, zoom and fit, rotate, and search the full text of every page – including pages that have not been rendered yet.

A few things to try

- **Search** – Open search and look for a word such as “document”. Matches are highlighted across every page.
- **Thumbnails** – Open the sidebar to preview pages and jump straight to one.
- **Zoom & fit** – Switch between page-width and page-fit, or zoom freely with Ctrl / Cmd and scroll.
- **Rotate** – Turn the page 90° – the layout keeps up.

Try it

The fields below are real, interactive AcroForm fields. With the viewer's forms option enabled you can type into them and tick the box.
